About the job

We are looking for a **senior level software / firmware engineer** to develop and validate software for GPUs for use in AI, ML, MV / CV.

We are looking for someone with good experience with GPU Acceleration, Parallel Computing / Supercomputing, CUDA, PyTorch, OpenCV, TensorFlow or similar.

Experience working in an international, remote team of engineers is very valuable for this position, as all work and meetings will be conducted remotely. Excellent communication in English and organisation skills are necessary to succeed in this role.

Candidates should have at least 5 years' experience with embedded software and firmware including the following skills:

- C/C++
- Python
- Device Drivers
- GPU Accelerators
- Embedded Linux

Following skills are nice to have:

- CUDA
- OpenMP
- Bring up
- MATLAB
- SSe
- CCS
- Assembly
- Debugging
- I2C
- SPI
- UFS
- GPIO
- UART
